

WHAT IS CLAIMED IS:

1. A ring-shaped metal gasket comprising:
an annular main body having a square cross section;
a pair of annular arm portions projecting
circumferentially outwardly of the annular main body in a bugle
state at a predetermined angle; and
an annular projecting portion bulging circumferentially
inwardly of the annular main body with a height larger than the
axial height of the annular main body.

2. A ring-shaped metal gasket comprising:
an annular main body having a square cross section;
a pair of annular arm portions projecting
circumferentially inwardly of the annular main body in a bugle
state at a predetermined angle; and
an annular projecting portion bulging circumferentially
outwardly of the annular main body with a height larger than
the axial height of the annular main body.
